DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The abstract of the disclosure is objected to because it contains legal phraseology such as "comprises" (see line 2). Correction is required. See MPEP § 608.01(b).

Claim Objections

3. Claims 2-7, 12-18, and 20 are objected to because of the following informalities:
Re claims 2-7, 12-18, and 20: Substitute "A terminal" with -- The terminal -- (see line 1).
Re claims 3 and 14: Substitute "it" with -- the indicator -- (see line 2).
Re claims 4 and 15: Substitute "the size" with -- a size -- (see line 1).
Re claims 5 and 16: Substitute "the color" with -- a color -- (see line 1).
Re claims 17 and 18: Substitute "the pre-defined transaction" with -- a pre-defined transaction -- (see line 1).
Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 1-3, 6-14, and 17-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Gatto (US 6,149,055).

Gatto discloses an electronic fund transaction system including a terminal 10 comprising a user interface including a plurality of indicators 14A for entering data, each indicator having a unique attribute and being associated with pre-defined transaction so that a user may execute a desired transaction by selecting a single indicator; wherein each indicator includes a push button and protrudes from a surface on which the indicator is mounted; and wherein the pre-defined transaction is programmed by a user and/or the owner of the terminal. The user interface also includes an identifier 13 and a dispensing area 18. (See figure 1; col. 6, lines 5-12 and line 60 to col. 7, line 65)

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 4, 5, 15, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gatto (US 6,149,055) in view of Wheeler (GB 2,304,449), cited by the applicant. The teachings of Gatto have been discussed above.

Gatto fails to teach or fairly suggest having indicators with unique attribute relating to the size or color of the indicator.

Wheeler teaches a telephone apparatus having push buttons with unique attribute relating to the size and color of the push buttons (see figure 12; col. 1, lines 6-17; col. 3, lines 21-30; and col. 18, lines 17-25). In view of Wheeler's teaching, it would have been obvious to an artisan of ordinary skill in the art at the time the invention was made to employ the notoriously old and well known push button keypad having differently shaped and color push buttons to the teachings of Gatto to allow a visually impaired person to easily identify the push buttons when conducting a transaction thus, reducing operation/transaction error made by the visually impaired person.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fought (US 4,314,352) discloses a banking machine and Blumstein et al discloses a visually impaired customer activated terminal system.
